IN-HOUSE NEWS LETTER OF

ELECTRONICS & COMMUNICATION ENGINEERING

ISSUE NO. JANUARY 2019/EVEN/ VOLUME 01

EDITOR : CREATIVE CLUB

CEO SPEAKS.....

Teamwork is a joint action by a group of people, in which each person subordinates his or her individual interests and opinions to the unity and efficiency of the group." This does not mean that the individual is no longer important; however, it does mean that effective and efficient teamwork goes beyond individual accomplishments. The most effective teamwork is produced when all the individuals involved harmonize their contributions and work towards a common goal.

Team or group work in a classroom teaches students the fundamental skills associated with working as a collective unit toward a common goal. This type of teamwork introduces a variety of skills that will be valuable for students later in the workforce, such as communication, compromise and collective effort. This teaches time management, resource allocation and communication skills.

Good Luck
(Mrs.FathimaBathoolMaluk)

DEAN ADMIN SPEAKS.....

Optimism is a trait that should become more common, judging by Winston Churchill's famous quote that "a pessimist sees the difficulty in every opportunity; an optimist sees the opportunity in every difficulty."

Focus, hard work is the real key to success. Keep your eyes on the goal, and just keep taking the next step towards completing it. If you aren't sure which way to do something then do it both ways and see which works better."

– John Carmack

If the success was free then everybody would have it. Most of the successful individuals had put in enough productive work before they received success in return. Just by working hard on what you believe in, you can understand its true value. That's when you start to respect the work itself and when you start to learn important life lessons.

"The human spirit needs to accomplish, to achieve, to triumph to be happy." -- Ben Stein

With good thoughts,
(Dr.S.Rajasekaran)

DEPARTMENT ACTIVITIES
