VISION

To be a school of excellence by providing holistic education and fostering research in Information Technology to produce technically competent, socially and ethically responsible students.

MISSION

- To provide a solid foundation in computational engineering for a successful career in Information Technology.
- To provide technical support and facilities to enrich research and development in the field of Information Technology.
- To collaborate in interdisciplinary projects with academia and industry through emerging technologies.
- To inculcate professional behavior, lifelong learning with ethical values.
- To empower engineers with excellent communication, teamwork and interpersonal skills.

Program Educational Objectives (PEOs)

- 1: To be a skilled professional in providing technically feasible solutions in data driven technology and security principles for industry and society.
- 2: To emerge as a developer & researcher by engaging in lifelong learning and adapting to challenging environments.
- 3: To exhibit entrepreneurship skills, leadership qualities and professional ethics to start new ventures.
- 4: To be prepared for their career in the software industry or pursue higher studies to enhance their professional knowledge.
