

ANNUAL REPORT

It is with great pride and purpose that we present the Annual Report for the academic year 2024-2025 of M.A.M. College of Engineering and Technology (MAMCET). This year has been marked by academic advancements, research milestones, student achievements, and overall institutional growth that reflects our commitment to excellence in engineering education.

Established in 2008, MAMCET began its journey with four undergraduate programs with an initial intake of 240 students. Over the years, we have expanded to seven undergraduate and four postgraduate programs with an annual intake of 1,700 students. We are supported by 100 faculty members and 75 supporting staff. Among the faculty, 15 are holding Doctoral Degrees, and 12 are pursuing PhDs. This year, the Department of Electronics and Communication Engineering was recognized as a Research Centre by Anna University, a significant step forward in our research endeavors.

Our academic departments have continued to strive for excellence. The Departments of Electrical and Electronics Engineering, Electronics and Communication Engineering, and Information Technology were granted with NBA accreditation status for three years. Our students maintained a strong performance in the Anna University examinations, placing MAMCET among the top-performing institutions.

Faculty contributions have been significant. Several faculty members published papers in SCI and Scopus-indexed journals and presented their work at international conferences. Notably, faculty members received awards for academic excellence, contributed book chapters, and successfully completed prestigious certifications such as NPTEL and ATAL FDPs.

Students have demonstrated remarkable innovation and drive. Seven student teams were awarded grants in a state-level hackathon. A notable student startup received Rs.1 lakh award and mentorship support. Teams advanced to national finals in innovation challenges, and final-year students received funding under the TNSCST Project Scheme. Students also participated in technical workshops, project contests, and national-level competitions, securing top ranks.

Our training and placement cell facilitated recruitment drives by over 26 companies, resulting in a placement rate exceeding 90%. Students were placed in both IT and core sectors with an average annual package of Rs.3 lakhs. Dedicated training programs in aptitude, communication, and technical skills were integral to this success.

Co-curricular and sports activities continued to thrive. Our students won accolades in athletics, badminton, swimming, cricket, and volleyball at the zonal and state levels. The NSS and YRC units carried out social initiatives such as blood donation camps, cleanliness drives, drug awareness programs, yoga day celebrations, and CPR training.

We have strengthened collaborations with industry and research institutions through strategic MoUs, including with the IIT-Madras Incubation Cell. Faculty and students actively participated in innovation ecosystems, industrial visits, and entrepreneurship development programs.

As we reflect on the progress made this year, we recognize the invaluable contributions of our faculty, staff, students, alumni, and partners. MAMCET remains committed to fostering innovation, academic rigor, and social responsibility. With continued support, we look forward to a future of impactful growth and excellence.
